3.5 Minute 5: Save and Exit 7

1 Installation Steps

The Student Information System is a console-based application written in C. It requires a standard C compiler (GCC) to run.

1.1 Step 1: Verify GCC Installation

Open your terminal and run the following command to check if GCC is installed:

```
gcc --version
```

Expected output:

```
gcc (Rev3, Built by MSYS2 project) 13.2.0
Copyright (C) 2023 Free Software Foundation, Inc.
```

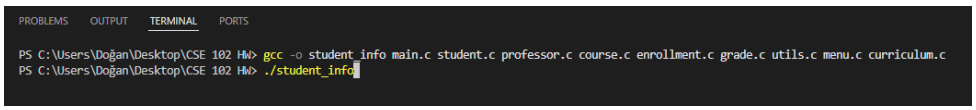

Figure 1: Verifying GCC compiler installation

1.2 Step 2: Compile the Application

Navigate to the project directory where you extracted the files:

```
cd "C:\Users\YourUsername\Desktop\CSE 102 HW"
```

Then, run the compilation command suitable for your OS:
Option A: Using Build Script (Recommended)

```
# Windows
build.bat

# Linux/macOS
make
```

Option B: Manual Compilation

```
gcc -Wall -Wextra -o student_info main.c student.c professor.c course.c
    enrollment.c grade.c utils.c menu.c curriculum.c
```

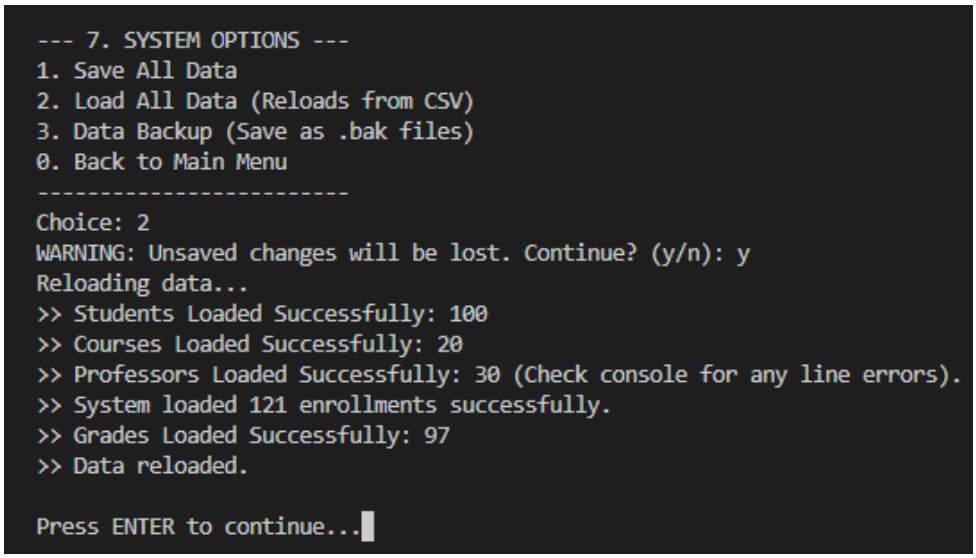

Figure 2: Successful compilation of the Student Information System

2 First-Time Setup

2.1 Launching the Application

After successful compilation, you can launch the system:

Windows:

```
.\student_info.exe
```

Linux / macOS:

```
./student_info
```

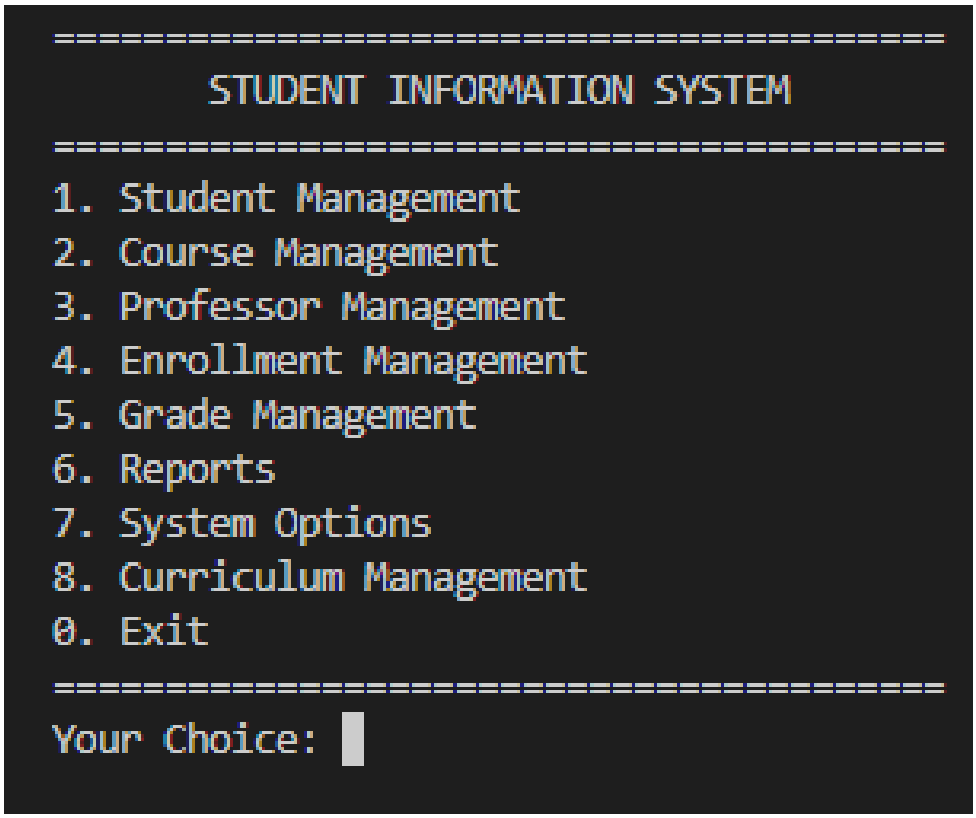

Figure 3: Launching the Student Information System

2.2 Main Menu Overview

Upon launch, you will see the main menu interface:

```
========================================
       STUDENT INFORMATION SYSTEM
========================================
1. Student Management
2. Course Management
3. Professor Management
4. Enrollment Management
5. Grade Management
6. Reports
7. System Options
8. Curriculum Management
0. Exit
========================================
Your Choice:
```

2.3 Loading Sample Data

The system automatically loads data from CSV files on startup. To verify data is loaded:

1. Press **7** for *System Options*.
2. Press **3** to *View Data Statistics*.

You should see a summary of loaded records (e.g., "Students: 15 records").

3 5-Minute Tutorial

This tutorial walks you through the complete workflow of adding a new student and enrolling them in a course.

3.1 Minute 1: Add a New Student

1. From Main Menu, press **1** (*Student Management*).
2. Press **1** (*Add new student*).
3. Enter the following information when prompted:
   - **First Name:** Jane
   - **Last Name:** Smith
   - **Email:** jane.smith@university.edu
   - **Phone:** 555-0123
   - **Enrollment Year:** 2024
   - **Major:** Computer Science
4. System confirms: `» Student added successfully. (ID: 2024XXX)`

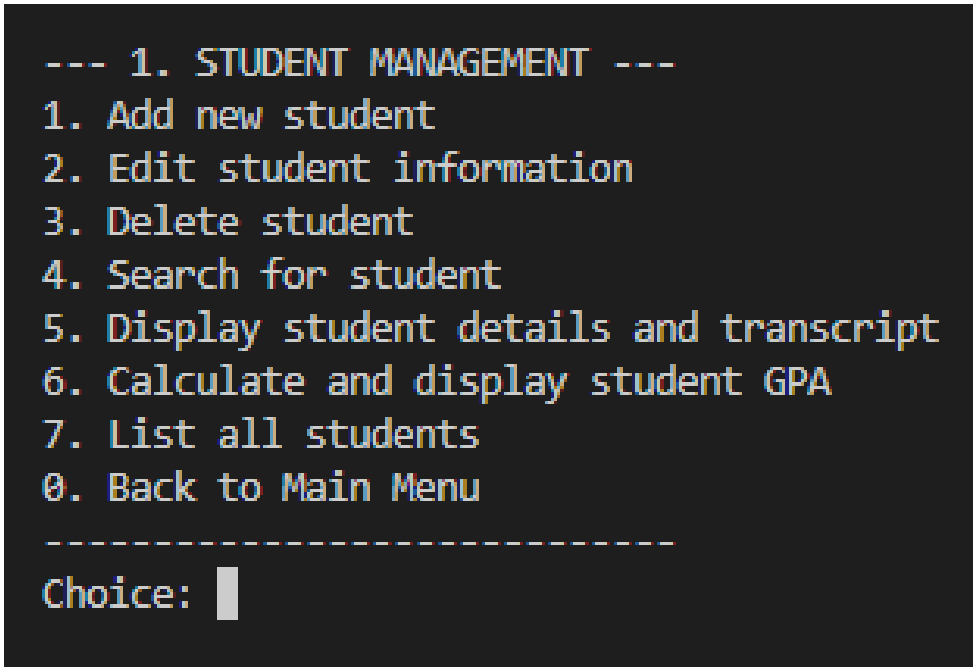

Figure 4: Adding a new student to the system

3.2 Minute 2: Add a New Course

1. From Main Menu, press **2** (*Course Management*).
2. Press **1** (*Add new course*).

3. Enter course information:
    - **Course Code:** CSE102
    - **Course Name:** Advanced Programming
    - **Credits:** 4
    - **Department:** Computer Science
4. System confirms: `» Course added successfully.`

3.3 Minute 3: Enroll Student in Course

1. From Main Menu, press **4** (*Enrollment Management*).
2. Press **1** (*Enroll student in course*).
3. Enter details:
    - **Student ID:** (Enter the ID generated in Minute 1)
    - **Course ID:** (Enter the ID generated in Minute 2)
    - **Semester:** 2025-SPRING
4. System confirms: `» Enrollment successful.`

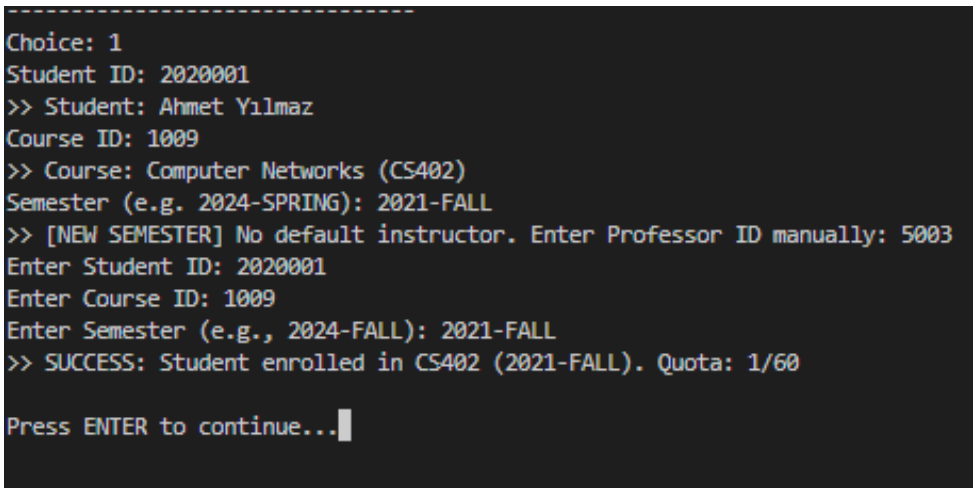

Figure 5: Enrolling a student in a course

3.4 Minute 4: Record a Grade

1. From Main Menu, press **5** (*Grade Management*).
2. Press **1** (*Record new grade*).
3. Enter:
    - **Enrollment ID:** (Use the ID from Minute 3)
    - **Numeric Grade:** 92
4. System confirms: `» Grade recorded successfully. (Letter: A-)`

3.5 Minute 5: Save and Exit

1. From Main Menu, press **7** (*System Options*).
2. Press **1** (*Save all data to files*).
3. Confirm that `» All data saved successfully.`
4. Press **0** to Exit.

Congratulations! You have successfully mastered the basics of SIS.
